

The following conditions of licence will apply to the processing of insects and insect products for human consumption. Complying with these conditions of licence will ensure that the insects and insect products sold in Singapore as food is safe and suitable for consumption.

S/N	Conditions of Licence for the Processing of Insects for Human Consumption
1	Insects used for processing are grown in a controlled environment.
2	The applicant should submit a HACCP /FSMS plan in their processing plans to identify the hazard and the control measures. The applicant should implement the HACCP/FSMS as submitted throughout the licence term.
3	Insects for human consumption should be subjected to sufficient heat treatment, or an equivalent bactericidal process, to kill pathogens prior to consumption; and are safe for consumption.
4	Products should be manufactured, packed, transported and stored in a manner that prevents contamination.
